National Motor Vehicle Title Information System

NMVTIS

National Motor Vehicle Title Information System

- Dealers and auctions can access through a third-party.
- Reduces titling of stolen cars and fraud by allowing state titling agencies to verify the validity of ownership documents.
Example: New York title is presented for transfer with an issue date 5/16/2018. NMVTIS response reflects Georgia title with an issue date of 9/9/2020. The Georgia title is the most recently issued ownership document for the vehicle and must be submitted for transfer.
- Checks to see if the vehicle is reported "stolen".
- Keeps a history of all brands ever applied by any state to a vehicle.
Example: You have a Texas title in your hand with an issue date 1/12/2010 - no brands are listed. The NMVTIS response reflects Montana title information with issue date 7/15/2000 with a "Rebuilt" brand. Florida will brand the title as "Rebuilt" even though it is from an earlier issue date.
- Allows the state to reduce the opportunity for introducing typographical errors by verifying details electronically.
